

Chicken Cage

Product Description

Metal chicken runs, also called metal chicken coops, are constructed from heavy duty galvanized steel frames and PVC coated chicken wires are designed to offer spacious space for your chicken, duck and other poultry and even rabbits. Optional half covers can protect chickens from burning suns, rains, snows and other bad weathers.

Product Advantages

- 1. Anti- Rust Metal – The steel mental, coating with zinc, features rust-resistance, anti-corrosion, and anti-fading, extending the service life of this pet playpen chicken crate.
- 2. PVC Coated Hexagonal Wire Mesh The wall of the chicken coop is made of PVC coated hexagonal wire mesh that is too solid and durable to damage. Also, the small gaps between meshes add safety to your chicken that prevent them from some predators.
- 3. Waterproof Cover – This waterproof cover fits our cage well perfectly. Providing for full protection from sun, rain, snow, the cover is needed for your lovely pets. The roof pitch of pet crate allows for water, debris and light snow to run off instead of accumulating on the roof.
- 4. Easy To Setup —Quality of our chicken coop constructed with simple assembly instructions will set up in minutes

Application

Elegant appearance, high strength, strong corrosion resistance. It is used for the beautification and protection of roads, residential areas, factories, park green spaces, etc.
